

Objective

To deliver capital growth in excess of the Consumer Prices Index over the recommended minimum time horizon of 7+ years.

The fund will seek to achieve its objective by investing at least 70% in collective investment vehicles, a roughly equal proportion of which will be allocated to defensive assets (such as fixed interest and cash) and growth assets (such as equities).

Asset Allocation

Investor Profile

You would like a significant proportion of your portfolio to be in higher risk investments, and you are willing to accept greater short-term potential for losses in order to generate returns that are in excess of inflation.

Your portfolio will typically have an equal exposure to growth assets (up to a maximum of 65% in equities), and defensive investments (such as fixed interest and cash).
