

## Objective

To deliver total returns in line with the Consumer Prices Index over the recommended minimum time horizon of 5+ years.

The fund will seek to achieve its objective by investing at least 70% in collective investment vehicles, a greater proportion of which will be allocated to defensive assets, such as fixed interest and cash, than to growth assets (such as equities).

## Asset Allocation

## Investor Profile

You are prepared to accept some investment risk, but would not be comfortable with investments in your portfolio which may put your capital at significant risk.

Preservation of your capital is important, and you would like to maintain the real value of your investments against inflation. Your portfolio will typically have some exposure to growth assets (up to a maximum of 35% in equities), but a much higher exposure to defensive investments (such as fixed interest and cash).
