

# Balanced.

## Fund Factsheet September 2025

### Objective

To deliver capital growth in excess of the Consumer Prices Index over the recommended minimum time horizon of 7+ years.

The fund will seek to achieve its objective by investing at least 70% in collective investment vehicles, a roughly equal proportion of which will be allocated to defensive assets (such as fixed interest and cash) and growth assets (such as equities).

### Asset Allocation

### Recent Changes Previous 3 months

- Purchased:** L&G UK Index, 3i Infrastructure Ord, International Public Partnerships Ord, iShares Edge MSCI Europe Minimum Volatility ETF, and iShares Edge S&P 500 Minimum Volatility ETF.
- Increased:** Lazard Japanese Strategic Equity, iShares Core MSCI EM IMI ETF, Xtrackers S&P Europe ex UK ETF, and L&G UK Mid Cap Index.
- Sold:** RGI European and Aberdeen UK Mid-Cap Equity.
- Reduced:** JPM UK Equity Core ETF, Lazard US Small-Cap Equity Fund, Baillie Gifford American, BlackRock European Absolute Alpha, two structured products, Xtrackers S&P Europe ex UK ETF, and L&G S&P 500 US Equal Weight Index.

Reduced our core UK equity ETF in favour of a UK all-share index fund, made available to us through a discounted share-class. Reduced our equity market neutral fund due to concentration risk. Reduced allocation to three US equity products in turn reducing US equity market risk. Reallocated capital across other equity markets with good value, and into higher-quality real assets with strong yields through the purchase of two new investment trusts. RGI European was sold in favour of our core European ETF due to a change in portfolio manager, and consequently, investment style. Aberdeen UK Mid-Cap Equity was sold due to underperformance, and reallocated into a passive UK Mid-Cap equity product. Finally, purchased two defensive ETFs to reflect somewhat declining market views.

All data is valid to the 31st August 2025 and collated by Astute Investment Management. Asset allocation data reflect the underlying holdings using the latest available data from Morningstar Direct. Please note, data may not add up to 100% due to rounding. Source: Morningstar Direct.

### Commentary

US Treasury yields fell in August, as expectations for central bank rate cuts increased. Following a sharp decline in the number of new jobs created in July, Fed Chair Jay Powell signalled a greater focus on the labour market side of the Fed's dual mandate, leading markets to price in a near-certain rate cut at the September meeting. Gilt yields rose, after higher-than-expected inflation data reduced the likelihood of further Bank of England rate cuts. European government bond yields also climbed, driven by political uncertainty in France. In global equity markets, Japan extended its multi-month rally helped by the recently agreed US-Japan trade deal and positive economic data. US equities gained over the month, despite weakening labour market data gains were supported by positive second quarter earnings in the S&P 500. Additionally, rising expectations for interest rate cuts helped small-cap stocks to outperform their large-cap counterparts.
