

# VT Astute Balanced.

## Fund Factsheet Sep 2026

### Objective

To deliver capital growth in excess of the Consumer Prices Index over the recommended minimum time horizon of 7+ years.

The fund will seek to achieve its objective by investing at least 70% in collective investment vehicles, a roughly equal proportion of which will be allocated to defensive assets (such as fixed interest and cash) and growth assets (such as equities).

### Asset Allocation

### Recent Changes Previous 3 months

- Purchased:** Xtrackers S&P 500 ETF, PIMCO GIS Emerg Mkts Opportunities, Structured Products.
- Increased:** M&G Global Emerging Markets, Polar Capital Em Mkts Stars, Blackrock Liquidity Fund.
- Sold:** Baillie Gifford American, L&G US Equity ETF, iShares Core MSCI EM IMI ETF.
- Reduced:** Blackrock Liquidity Fund, iShares Core MSCI EM IMI ETF.

Within equities, switched the core index holding into a lower-cost equivalent. Trimmed Emerging Market equity to reduce exposure to concentrated indicies. Within fixed income, added to Emerging Market debt, funded by the equity reduction and existing liquidity holding, broadening the region's exposure beyond a concentrated equity benchmark. Within alternatives, we topped up on more structured products to return the sleeve to its target weight.

All data is valid to the 31st August 2026 and collated by Astute Investment Management. Asset allocation data reflect the underlying holdings using the latest available data from Morningstar Direct. Please note, data may not add up to 100% due to rounding. Source: Morningstar Direct.

## Commentary

The global economic landscape remains dominated by tensions between fiscal and monetary policy. For example, the US Treasury's surprise announcement of long-dated bond buybacks, aimed at flattening the yield curve, appears to run counter to the Federal Reserve's ongoing debate over a September rate hike. Elsewhere, European and UK markets continue to grapple with sticky inflation, as geopolitical friction in the Middle East and precarious peace talks have kept energy prices elevated. This is pushing the European Central Bank towards further tightening despite a weakening growth backdrop, while a further increase in Ofgem's energy price cap is likely to reluctantly force the Bank of England into monetary tightening as well. Finally, equity markets faced significant volatility in August, driven by leverage and rapid swings in AI-related investments such as Korea-listed SK Hynix. While these wild swings in valuations can make some markets difficult to invest in, there remains no doubt that AI-driven trends will continue to build, with no signs of slowing given the scale of capex commitments seen so far.
